Additional Note: Due to a pasting and posting error not detected until after the Hunter Round was already in progress, five targets had 1994 (5/3) hunter faces posted. The faces were scored 5/4/3 and simply resulted in slightly more difficult scoring on those targets for arrows outside the 5 ring. All archers shot the same faces and no replacement faces were used.

As expected, the Keowee Bowmen range was absolutely beautiful. Weather was warm and humid, but plenty of water was available on the range. The Hunter Round was shot with a comfortable drizzling rain for about a quarter of the round. The host club did their usual superb job hosting the tournament.
